

the next generation in skin rejuvenation

Sublative Rejuvenation™ is breaking new ground in the field of cosmetics by offering patients of all skin types a safe and effective solution in reversing multiple signs of aging. Unlike other treatments that work from outside-in, Sublative Rejuvenation works from the inside-out – targeting collagen production required for treating fine lines and wrinkles, acne scars, and textural irregularities caused by excessive sun exposure and aging.

Now you can look as young as you feel with Sublative Rejuvenation. Schedule a personal consultation today!

Energy is applied to the skin in matrix spots. The healthy skin around the spots accelerates the healing process.

Sublative Rejuvenation

Refresh the appearance of areas around your cheeks and eyes. Reduce the appearance of wrinkles and texture irregularities.

Smooth lines around your nose and mouth. Treat brown, red and pink spots.

How does Sublative Rejuvenation work?

Sublative Rejuvenation was developed with patients of all skin types in mind. Sublative Rejuvenation is fractionated bi-polar radio frequency energy, making it an entirely unique way of treating skin. Exclusively with this energy, Sublative Rejuvenation keeps the majority of the top layer of the skin intact, delivering bulk dermal heating beneath the skin to maximize collagen production.

Is Sublative Rejuvenation right for me?

Unlike traditional aggressive laser treatments, Sublative Rejuvenation produces minimal damage to the surface layer of the skin, making it a safe and effective treatment for all skin types.

When can I expect to see results?

A minimum of 3 treatments every 4-6 weeks is typically recommended for optimum results. The total number of required treatment sessions depends on your skin's condition – schedule a personal consultation to discuss the best Sublative Rejuvenation regimen for you.

Does it hurt?

During treatment, many patients feel a warm, prickly sensation as the radio frequency energy enters their skin. After treatment a pink or red "sunburn" appearance and feeling is also common. Topical anesthetic ointments can be used to reduce unpleasant feelings during treatment.

Post two treatments.

SUBLATIVE
REJUVENATION™

the beauty of sublative rejuvenation

Over time, our skin's youthful appearance is affected by the cumulative affects from sun exposure, loss of collagen and moisture, and more. Sublative Rejuvenation is used to treat fine lines and wrinkles, acne scars, textural irregularities caused by excessive sun exposure, and skin laxity; restoring your skin's natural beauty.
